

# Release 8.7

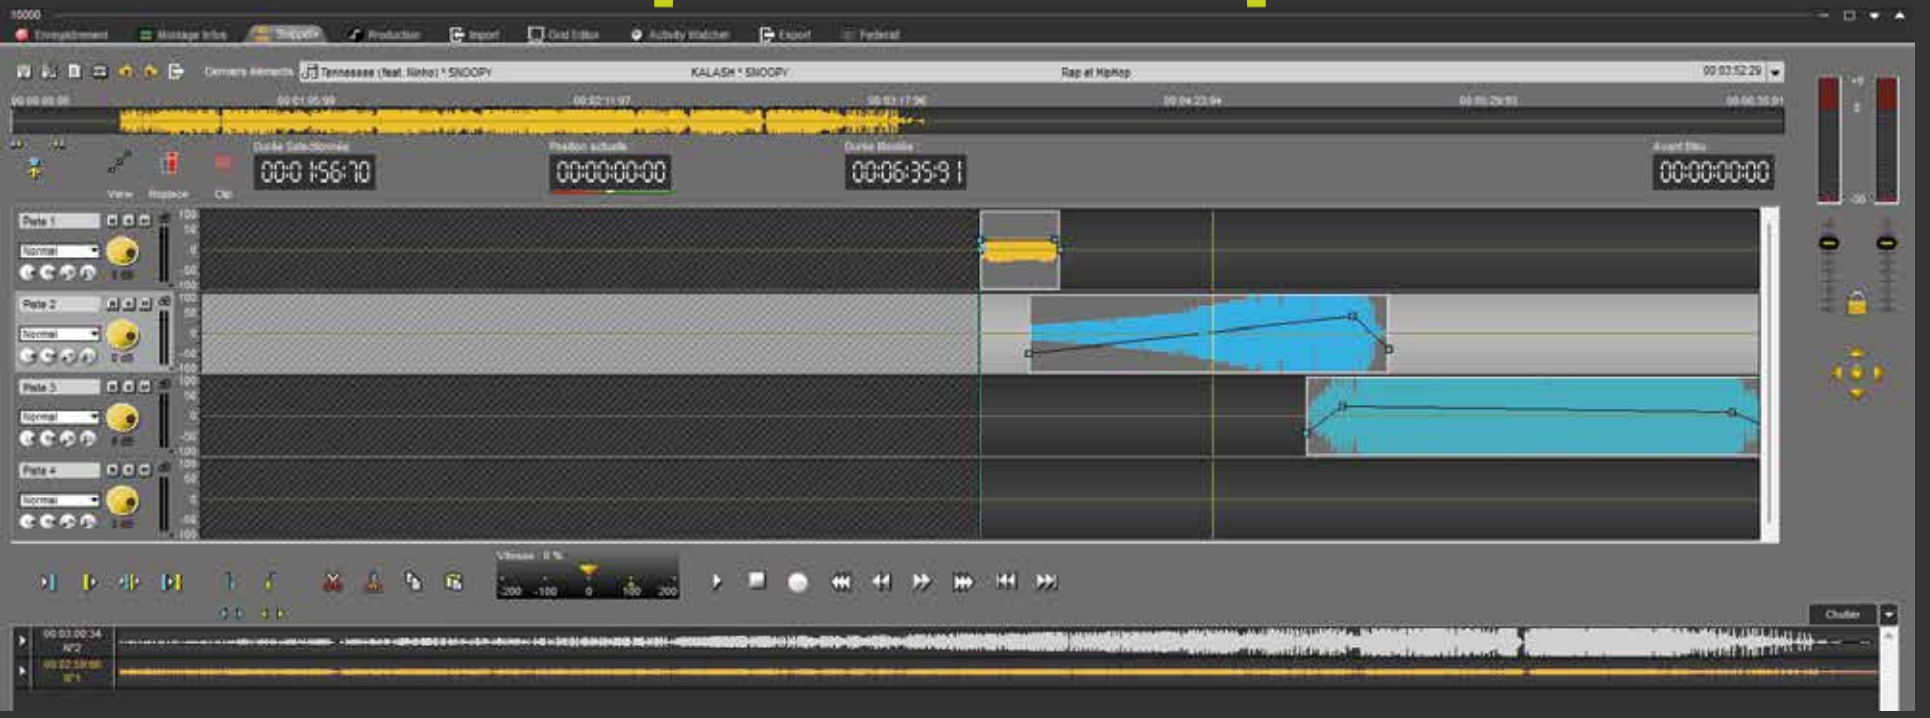

Release 8.7 is available currently. Here's a roundup of the main features.

 **Mode insert All**  
Insert new sound items whilst keeping the current mix on all the tracks

 **Export AAF**  
Finalise Snippet+ edits with an expert production tool :SEQUOIA and ProTools 2021/22

 **Not forgetting**  
Visualise the sound level of each track;  
Empty the cuttings bin with a click;  
Access clip indexation with keyboard shortcut Ctrl+O

## Snippet+

 Improved visualisation of edits

 Start the day more quickly: application loading time reduced

 Improved user experience: icons better translated etc

## RadioAssist

 Zoom the grid with keyboard shortcut CTRL+mouse wheel

 Popup to confirm clear all

 Configure the colour, font & pre-roll

 Make things simple with multiple mode mix

## GridEditor Federall

 Easy configuration of multichannel audio cards

 Visualisation of loudness levels now available

 Windows default audio output setting

 Optimisation and stability of our audio engine!
